

**UNIVERSITY LABORATORY SCHOOL**  
A Hawai'i Public Charter School

---

Aloha ULS Parents and Guardians,

As part of our health and safety protocols in our ULS Student/Parent Handbook 2021-2022, ULS will continue to utilize the health check-in system known as LumiSight Campus. LumiSight Campus is a self-screening platform that supports the well-being of parents, students, employees and visitors in the University Laboratory School community. It was developed by DataHouse Consulting, a local Hawai'i company dedicated to supporting our communities through innovative technology solutions.

LumiSight Campus will be used as our systemwide daily check-in app for all students, parents, employees, and visitors, consistent with our published COVID-19 response guidelines. It is an integral part of our strategy to operate our school campus in a manner that keeps our community safe during the current public health crisis. The form and format of the daily check-in questionnaire was created by the University of Hawai'i Public Health team, that includes the head of Student Health Services, and the Deans of the University of Hawai'i School of Medicine and School of Nursing. LumiSight Campus is expected to be the frontline of ULS' wellness communications within our community, and supports the CDC recommended daily self-attestation of health for any of our community that will be present at our campus.

**Parent/Guardian Responsibility:**

- Review the [LumiSight ULS User Guide](#) and follow the step-by-step instructions to set up your account. You can also view this [LumiSight ULS User Guide Video](#) for instructions. Both of these documents are linked on our school website under the Resources tab.
- Once registered, parents/guardians can log on to the ULS LumiSight app and complete the symptom checklist for each child enrolled at school.
- Based on the response to the symptom check, the check-in app will instruct parents/guardians to keep their child at home or welcome the student to school. If your child is sick, please follow the school attendance reporting procedures by leaving a message at (956-7833) before 7:30 a.m. or by email at [attendance@universitylaboratoryschool.org](mailto:attendance@universitylaboratoryschool.org).

Information from the daily health check-in app will be used to cross-check attendance and monitor adherence to the School health policy. Compliance on the use of the symptom screening checklist will be monitored and followed up by the ULS Administration if there is chronic non-compliance.

If you need assistance with setting up your account, please contact Datahouse directly at [lumisight-campus@datahouse.com](mailto:lumisight-campus@datahouse.com)

Mahalo!

ULS Administration
